OnPlanSM

Expert contingency-plan development
and rapid disaster response

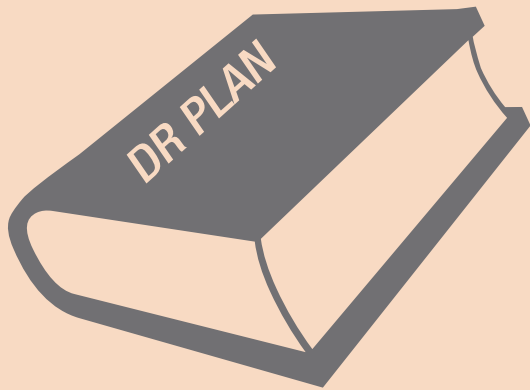

OnPlanSM
activates your
organisations
disaster
recovery
plan →

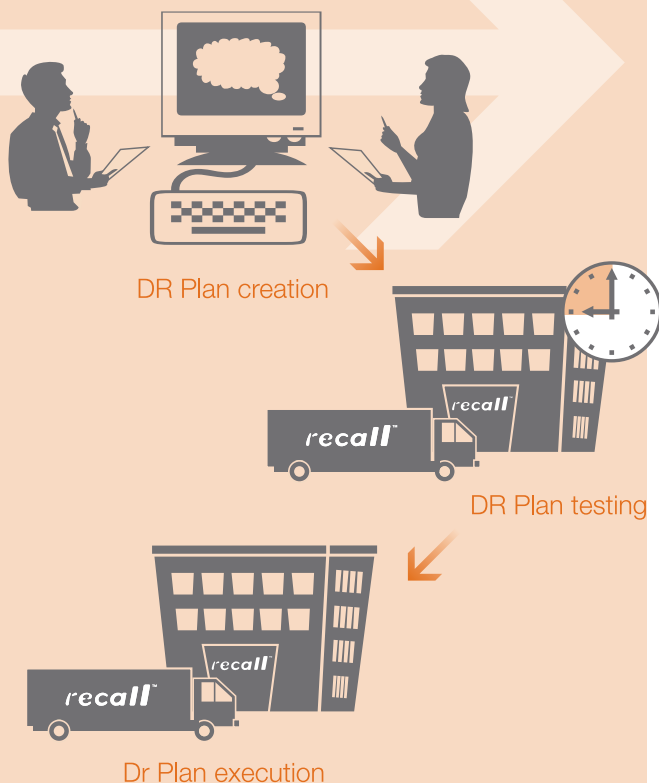

Recall's OnPlanSM service is the cornerstone of a successful disaster recovery strategy. The moment a disaster test or event is declared, OnPlan goes into action. With turnkey efficiency, OnPlanSM activates your organisation's disaster recovery plan, executing the chain of events that form the critical first step in the backup/recovery continuum.

OnPlanSM

Expert contingency-plan development
and rapid disaster response

As part of Recall's comprehensive Data Protection Services, OnPlanSM provides proven methodologies, technologies and personal responsiveness in support of your company's contingency plan – helping ensure that critical business applications are successfully recovered in the event of a disaster.

Unless a disaster recovery plan is properly prepared, understood and invoked, it offers little value.

Procedures and expertise to help you avert catastrophe

Recall's OnPlanSM service makes sure you're covered. As the first line of defense in the backup and recovery strategy, OnPlanSM empowers your contingency plan. Through this service, Recall takes full responsibility for a turnkey solution customised to protect your business from devastating losses. OnPlanSM enforces your rotation policies, making sure that necessary media and plan documentation are under Recall's protection at any point in time, and that all items are accurately identified. Maintaining contact with the proper disaster coordinators at your company, OnPlanSM speeds the movement of vital media to hot site locations.

Highly responsive and reliable

OnPlanSM expertise comes from on-the-job IT experience. Recall specialists know what's required to ensure continuously available operation, and have a thorough grasp of contingency planning. Recall can help you design the logistics that are central to a disaster recovery program. All of Recall's worldwide locations mirror the same high levels of consistency, reliability and standardisation.

Highly responsive and reliable

As the enabling partner that transitions your company from data loss to data recovery, Recall melds the needs and objectives of your data processing organisation with those of your hot site providers. Recall maintains close working relationships with the most respected names in the business. Clients and hot site providers alike measure Recall's performance on a 24x7 basis, and give the company consistently high ratings.
